

Project

A Project SUBMITTED TO

Submitted in partial fulfillment of the requirements for the degree of

Master of Computer Application

M.C.A. :: Sem 3

SUBMITTED BY

ERIC VASAVADA

(Enrollment No: 230441039)

UNDER THE ESTEEMED GUIDANCE OF

Mr. Uday Shah

Faculty of M.C.A.

NOBLE MCA COLLEGE JUNAGADH

PREFACE

There is a wide difference between theory and practical. If one has only theoretical background of any subject, one would not succeed in own aim therefore it is necessary for any person to have acceptable practical knowledge of the concerned subject. As I know MCA is a course based on “Information Technology” and it is totally practical field. With only theoretical knowledge one can’t be succeeded or one can’t be on the peak position.

In the course of MCA designed by the “**Noble University**” they have taken full care of these things and designed the course in such a manor with which student can get theoretical and practical both type of knowledge perfectly. According to the rules & regulation of “**Android Application Development**”, I have a subject named “**Cup of Joy App**”. In which we have to create a Android Application project of any institute or industry.

As a **MCA** student, I have gathered general information about Whole Admission Process. Then I decided to develop the site for that. In this site you can start admission to any collage very easily. You can also put the advertisement on this site.

In this project report I have covered all the information, which is required for the Android Application project of MCA student.

I have tried as my best present this project report in such a way that it makes easy to understand the project work.

CERTIFICATE

This is to certify that the Project report entitled _____ is a Bonafide record of research work done by Enrollment No. : _____ under my supervision and submitted to Noble University in partial fulfilment for _____ Sem – 3.

ACKNOWLEDGEMENT

I am thankful to all, who have helped me in preparing this project. I am very much happy to present this “ **Cup of Joy Project Report**”. Before you, expecting that you will acknowledgement it. It is a matter of great pleasure for me that I had an opportunity to express my view on the same.

As a part of my academic study as the student of 3th semester of M.C.A. I am required to experienced training software project an institute or industry in order to obtain practical knowledge and broaden me regarding the same.

At first, I would like to express my & humble thanks & gratitude to the who has provided me such a great, Co-operative & progressive environment.

Secondly at this moment, I would like to express my deepest sense of gratitude to my professor as well as project guides and who have contributed their precious time for the purpose of giving me the correct information with special interest & guidance throughout my project work.

I am also thankful to my classmate and few others who helped me directly or indirectly in solving problem & in making my software project more efficient & good working.
